Jonah Largen

Lab #02

1/24/17

Input:

Problem 01

When running the program, it asks for a number of miles, and waits for the user to type an input.

In this case, I chose 50.4, and then it outputted the conversion to yards.

Problem 02

This problem had no input.

Output:

Problem 01

```
<terminated> (exit value: 0) Lab2x1.exe [C/C++ Application] C:\Users\Jonah\workspace\Lab2x1\Debug\Lab2x1.exe (1/24/17, 3:02 PM)
Enter number of miles: 50.4
The number of yards is 88704. (truncated to nearest integer)
```

Problem 02

The program successfully outputted the compiler's number of bytes allocated for a long double,

which is 12.

<terminated> (exit value: 0) Lab2x2.exe [C/C++ Application] C:\Users\Jonah\workspace\Lab2x2\Debug\Lab2x2.exe (1/24/17, 3:05 PM)
The size of d is 12
